### Program Description

The Wildland Firefighting Diploma consists of seven National Wildfire Coordination Group (NWCG) courses taught by certified instructors, and supporting Natural Resource courses. The goal of the diploma is to provide students with the necessary background to become wildland firefighters, while also building Natural Resource skills to help secure employment during non-fire periods. The current job market for wildland firefighters is excellent, and graduates are hired by many natural resource agencies.

### Occupational Titles

Wildland Firefighter

### Program Learning Outcomes

Graduates of this program will:

1. Gain an understanding of the biological and ecological principles relevant for making decision in Natural Resource management.
2. Develop an understanding of the interactions of society’s needs, personal ethics and environmental constraints as input to resource management decisions.
3. Develop skills in the application of technology and field-based skills for Natural Resource assessment.
4. Demonstrate skills and scientific principles acquired through the Natural Resource program in a work setting in Natural Resource Management.
