PSYC 1325 – Psychology of Sustainability

Program Description

The Applied Psychology/Human Services program is one of a kind in Minnesota! It was designed to provide a strong foundation of knowledge and skills for students who are interested in going into a variety of human service-related fields (e.g., psychology, social work, case management, corrections, chemical dependency counseling). In addition to completing general education requirements, the AS offers students a transformative experience that emphasizes application of learning and direct field experience.

Program Learning Outcomes

Graduates of this program will:

1. Demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, careers, and historical trends in psychology/human services.
2. Respect and use critical thinking, skeptical inquiry, and, when possible, the scientific approach to solve problems related to behavior and mental processes.
3. Understand and apply psychological/human services principles and basic helping skills to personal, social/community, and organizational issues in a landscape that involves increasing diversity.
4. Develop an understanding of career opportunities and professional issues in psychology/human services.
5. Gain insight into their own and others' behavior and mental processes and apply this knowledge to promote more effective functioning.
6. Demonstrate competence in writing and in oral and interpersonal communication skills.
7. Become familiar with the formal regulations that govern professional ethics in psychology/human services and begin to embrace human services values as well as demonstrate adherence to professional values/ethics.

Transfer and Articulation Agreements

The AS degree in Applied Psychology/Human Services affords easy transfer to various institutions through completion of the Minnesota Transfer Curriculum (MnTC). See your advisor for further information and to ensure all MnTC goal areas are met. There are also formal articulation agreements with Bemidji State University (BSU) and University of North Dakota (UND) for students interested in pursuing a four-year degree in psychology at those institutions.
